Internship Final Evaluation  
Instructional Technology

Intern: Nick Paolini

Cooperating Internship Supervisor: Jason Williams

Nick Paolini completed an internship experience with me July through August of 2010. Nick was a pleasure to work with during the internship experience. He showed initiative when completing tasks and he conducted himself in a professional manner. Nick was very interested in how "things work" in regard to networking and computers. By the end of his internship I feel he a good foundation for further study in this area.

Nick created an Apple Macbook training for teachers who wanted a very basic understanding of how the Apple computers operate. Teachers enjoyed Nick's training and the pace of the professional development day. After the completing the internship experience I feel that Nick has better prepared himself to understand all aspects of the Instructional Technology Specialists certification.
